SETTING SIEMENS CONTROLLER FOR AIR CONDITIONER

Switch on air conditioner.

Press and hold $^{\circ}$ and $^{\vee}$ buttons for 5 seconds, then release.

Press and hold ^ button for 5 seconds.

Display should show P00.

(NB - If display shows 0.0°C, you have held buttons for longer than 5 seconds.)

Using enter button, scroll through settings P00, P01 etc as shown on next page. Adjust values as required using $^{\circ}$ and $^{\vee}$ buttons.

Values to be adjusted include the symbols at bottom of display ie
(H) – Heating (3 wiggly lines)
(C) – Cooling (circle with 6 points)
(F) – Small fan (triangle with 3 lobes)
(FFF) – 3 fans
(FFFA) – 3 fans and AUTO

(NB - If air conditioner is heating instead of cooling, check symbol for setting P06.)
